Research and Development plays a key role in the continued growth of Imperial Armour. The company invests significantly in the continued aim of increasing levels of protection and comfort, reducing weight and reducing costs.

THE ARMOUR

Imperial Armour is able to offer protection from fragmentation up to high velocity armour, depending on your requirements and needs. Our systems have been tested and conform to NIJ standards and South African Bureau of Standards. We are proud to announce that we are now accredited with SGS ISO 9001:2000 for quality and control.

Ballistic Systems:
NIJ Level II & IIIA. SABS Level C & D

Dual Protection:
Any combination of ballistic and anti-stab protection is available.

Protection is achieved by a choice of ballistic hybrid systems:

- Kevlar/Aramid
- Goldflex/Goldshield
- Dyneema

NIJ Level III & IV ceramic or Dyneema plates are combined with soft body armour to stop high velocity ammunition. Our lightest NIJ Level IV plate is currently 2.5kgs.

BALLISTIC BLANKET

The Imperial Armour ballistic bomb blanket provides a portable, flexible, and lightweight multi-purpose means of ballistic protection.
